

Measure R Recount

Discrepancy Report

Batch	Discrepancy			Explanation
	Machine	Manual	Diff	
ICC01 VBM - 11	12 - Yes 17 - No 1 - Undervote	12 - Yes 18 - No 0 - Undervote	+1 - No -1 - Undervote	Machine counted 1 card as an undervote due to the voter marking the ballot too far outside the voting position. The voter marked "No" over the word "No" and not the voting position as per instructions. The voters mark was beyond the range that the machine reads and therefore was not flagged to be adjudicated.

***Adjudication is the process of operators visually looking at a digital image of a ballot and determining the voter intent.**
